

JO

I believe in a united and collaborative approach to children's learning. Children are the directors of their learning, and I am the support to help them reach their full potential with great success.

As an educator I believe children need time to decide what they want to learn and to do this with little to no interference from the adult.

My philosophy in early childhood is catch those "teachable moments", to provide a positive friendly environment that continues the development of confidence, discovery, idea forming, a trusting warm inviting atmosphere that the children feel safe and empowered to be

the best competent learners they can be.

Each child is a unique learner and with an enriching and supporting environment children will develop to their full potential.

I am very committed in supporting families, working in partnership to enrich their children's lives, their hopes, dreams, joys and aspirations. Families are the first teachers of our children and to build a trusting relationship with whanau in turn build's the trusting relationship with their children.

It is an honour to be on this partnering journey for the youngest members of our community.
