

Immunisation Policy

Rationale:

It is a government regulation requirement that Akoranga Preschool holds an accurate immunisation record of all children on our roll.

Te Whāriki:

Well-being Goal 1 – Children experience where their health is promoted.

Procedures:

- The Ministry of Health requires all licensed Early Childhood centres to sight and record every child's immunisation history
- An immunisation register will be kept, so that in the case of an outbreak, any child who is not immunised, their family will be informed by management from Akoranga Preschool. All families of children who are not immunised will be given the choice to remove their child from the centre until the outbreak has passed.
- The immunisation register will be updated on enrollment and every 6 months.
- For your own child's wellbeing, it is helpful for you to inform us after each immunisation has been given.
- These records are confidential
- Immunisation certificates are located in the back of your child's Well Child Tamariki Ora Health book. This certificate should be signed by your health professional after each immunisation.
